

ALFONSOMARINA®
EBANISTA

ALFONSO MARINA® EBANISTA

Since 1971 Alfonso Marina has worked with some of the most influential designers in many residential projects from country estates in St. Paul de Venice to contemporary penthouses in New York City and hospitality projects such as the Biltmore Four Seasons in Montecito and The Ritz Carlton in Half Moon Bay.

Our goal is to offer superior pieces with casual elegance, those that show harmony, design and proportion, not limiting to a certain period or provenance.

We like to devote ourselves to those who recognize the nobility and beauty of the finest materials, those who value dedication, patience and pride of craftsmanship and appreciate the quality produced using old world techniques to recreate the best carvings, incredible veneering and inlays gracefully finished to achieve the antiquity and patina only found in the best antiques.

We, at Alfonso Marina & Co. proudly consider ourselves as artisans preserving the art of woodworking.
